About FH India

Family Health India (FH India) is registered under Section 8 (25) of the Companies Act. With a vision to improving the quality of life of the most marginalized, FH India works in health, nutrition, water and sanitation, and integrated rural development in states with poor development indices such as Madhya Pradesh, Chhattisgarh, Uttar Pradesh, and Rajasthan. FH India teams work collaboratively with state and district governments and community structures such as Panchayati raj institutions, self-help groups and a cadre of community volunteers and health educators to accelerate the response to public health diseases and developmental challenges at the last mile. FH India has managed CSR development projects funded by Godrej Goods and Green, HDFC Bank, Avantha Foundation, BILT India, WHO/India and UNDP. FH India has sound financial, human resources, administrative and procurement systems to ensure that we are compliant with Indian laws and regulations.

We have implemented projects in Madhya Pradesh, Uttar Pradesh, Chhattisgarh, Chhattisgarh and Rajasthan states. Our headquarter is in New Delhi and we have field offices in Budaun, Bareilly, Kanpur and Lucknow in Uttar Pradesh; and Bastar and Kondagaon in Chhattisgarh; and Shivpuri, Sheopur, Balaghat, Sidhi, Singrauli, Hoshangabad, Bhind, Gwalior and Bhopal in Madhya Pradesh.

Key funders and collaborators:

Corporate:

- Godrej Good and Green Pvt. Ltd.
- HDFC Bank
- Avantha Foundation
- BILT

Government:

- Ministry of Health and Family Welfare (MoHFW), Government of India (GoI)
- State Governments of Madhya Pradesh, Uttar Pradesh and Chhattisgarh
- National Vector Borne Disease Control Program (NVBDCP)

Civil Society:

• Local NGOs and civil society organizations (CSOs) in intervention states

UN Agencies:

- United Nations Development Programme (UNDP)
- World Health Organization (WHO)

Past Projects

2009-2012

People Living with HIV (PLHIVs) project- During the year 2010 - 2011, FH India work has benefited 1,668 PLHIVs in Maharashtra and Orissa in partnership with Avantha Foundation and BILT. A total of 1,668 PLHIVs are registered at both the Antiretroviral therapy (AIDS treatment, ART) centres (735 at Ballarpur and 933 at Koraput). Of these 326 and 480 PLHIVs are on ART at Ballarpur, Maharashtra and Koraput, Orissa respectively. This work has been undertaken in areas that are among the most underdeveloped in India and the PLHIVs are drawn from economically and socially backward sections of the society. The work complements the work done by the Government of India through NACO and the State AIDS Control Societies of Maharashtra and Orissa.

FH India continued to strengthen and scale up its work with PLHIVs and undertook a range of activities for the betterment of their lives in year 2011-2012. A total of 1,926 PLHIVs are registered at both the Antiretroviral therapy (AIDS treatment, ART) centres (814 at Ballarpur

and 1,142 at Koraput). Of these 350 and 578 PLHIVs are on ART at Ballarpur, Maharashtra and Koraput, Orissa respectively.

2013 - 2014

1. Poverty reduction:

a. Implement projects with marginalized and poor populations on economic livelihood, access to social protection and welfare schemes of national and state governments and income generation programs

2. Education

- a. Implement projects with girls to improve retention in higher secondary schools and complete education up to 10th standard in northern states in India
- b. Improve quality of education provided in schools (primary and secondary) in collaboration with national and state education departments
- c. Strengthen pre-school education and early education in collaboration with Ministry of Women and Child Department and state departments
- d. Strengthen vocational training and skills training for older adolescent children

3. Medical relief

- a. Implement project activities to increase availability; accessibility and supply of Zinc and Oral Rehydration Salt (ORS) as part of the Diarrhea Alienation through Zinc/ ORD (DAZT) Project in the states of Uttar Pradesh, Madhya Pradesh and Gujarat.
- b. Strengthen education, information and communication around HIV/ AIDS; Family Planning; Tuberculosis and Maternal Child and Neonatal Health at the national level and in select states in India.

2014 - 2015

FHIndia continued to strengthen and scale up its work with PLHIVs and undertook a range of activities for the betterment of their lives Koraput (Orissa) and Chandrapur (Maharashtra).

World Health Organization (WHO) provided a grant to Family Health India in February 2015 to support charitable activities on integration of tobacco cessation among tuberculosis patients in the state of Rajasthan.

Family Health India staff and consultants assisted the Rajasthan TB Control Program in conducting training of trainer's workshop at state level (March 2015) and at District level (March 2015).

2017 - 2020

SAMARTH - Integrated rural development project - In the year 2017 Project SAMARTH was started with support of HDFC bank. Project aims at integrated rural development including integrated rural development, environment sustainability, quality education, renewable energy, agriculture development, formation and strengthening self-help groups and livelihood promotion.

Current Projects

Elimination of mosquito borne endemic diseases (EMBED) project (Rural)- EMBED project is aimed to contribute to the goal of elimination of malaria from India by 2030. Goal of the project is to reduce morbidity and mortality due to malaria and dengue. The field teams include community volunteers and behaviour change facilitators (BCCF) who conduct village chaupals (small group meetings), make door-to-door household visits, conduct community awareness drives using local folklore and demonstrating use of bed nets, support the government frontline workers in undertaking larva surveys and fever screening; supporting the department of health in the distribution and use of long-lasting insecticide nets (LLIN)

and indoor residual sprays (IRS); and tracking cases of malaria and following-up for treatment adherence

Youth ki Awaz project - Youth ki Awaz (YKA) Project, supported by the Corporate Social Responsibility (CSR) initiative of Godrej Consumer Industries Private Limited is being implemented in four intervention villages near Godrej Factory location in Malanpur, Bhind, Madhya Pradesh.

Elimination of mosquito borne endemic diseases (EMBED) project (Urban)- The Elimination of Mosquito Borne Endemic Diseases (EMBED) Project (Urban), supported by the Good and Green, Corporate Social Responsibility (CSR) initiative of Godrej Consumer Industries Private Limited started in December 2020.

The Project interventions started in four cities in Madhya Pradesh and Uttar Pradesh i.e. Bhopal, Gwalior and Lucknow, Kanpur. This phase of the project covers a total of 400 slums of high burden of dengue cases across these four cities in two states. The key approaches adopted included: influencing positive behavior change through group meetings complemented with home visits and community mobilization and awareness creation activities; linking families to health care providers for timely diagnosis and treatment of Dengue and Malaria; and training of ASHA workers and health care providers (HCP) on early and correct diagnosis and treatment for dengue and malaria.

SAHYOG

SAHYOG is a capacity building programme of NACP. Under the Global Fund for AIDS, TB and Malaria (GFATM) new grant (April 2021 -March 2023), HLFPPT along with Family Health India and Public Health Foundation of India as Sub Recipients are implementing the Capacity Building project with NACO.

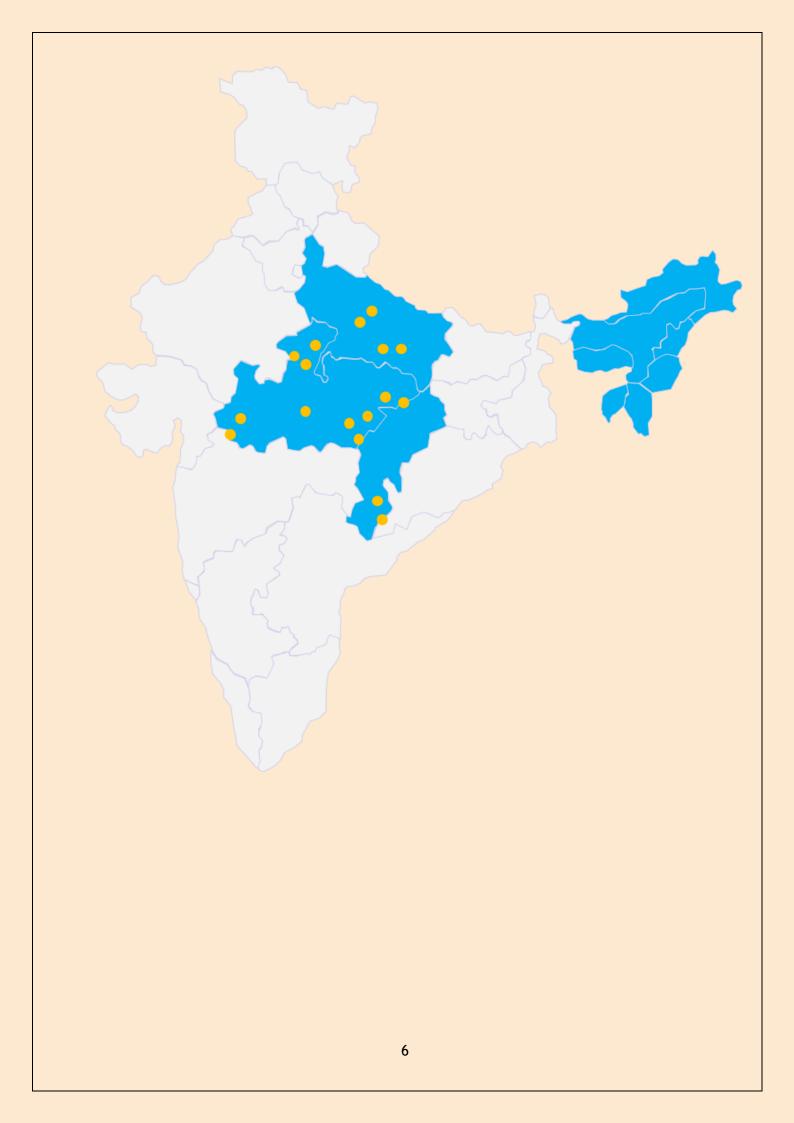

SAHYOG is a capacity building programme of NACP which was introduced in 1st of April 2021 that will continue till 31st March of 2024. Under this project training programmes will be organised in the 36 states/UTs of India. The Principal Recipient (PR) for the "SAHAS Grant" for GFATM is the National AIDS Control Organization (NACO) - Ministry of Health & Family Welfare (MoHFW) - Government of India (GoI) from April 1, 2021 to March 31, 2024. For Project Component-Capacity Building, a Memorandum of Understanding (MoU) was signed between NACO-MoHFW-GoI and Hindustan Latex Family Planning Promotion Trust (HLFPPT).

Community Led Monitoring in Three Northeast States of India- A Pilot Initiative
Community System Strengthening (CSS) is a key strategy that has been adopted by the
National AIDS Control Program (NACP) in India as it moves from Phase IV to Phase V. One of
the most crucial components of the CSS framework is Community-Led Monitoring (CLM). CLM
can play a key role in bringing to focus the ground realities of availability and access to HIVrelated service provision, service quality, and the barriers associated with service delivery.
With funding support from the Centers for Disease Prevention and Control (CDC) and UNAIDS,
Family Health India piloted the implementation of CLM in 15 districts in the three Northeast
states (Manipur, Mizoram, and Nagaland) using the tools developed by the National AIDS
Control Programme.

Thematic Areas of Work

- Health and Sanitation: Vector Borne Diseases (VBD), HIV/AIDS, reproductive, maternal, neonatal, child and adolescent health (RMNCH+A) and Health system strengthening; water, sanitation, and hygiene (WASH)
- **Environment:** Solid and plastic waste management, Renewable energy, and Environment sustainability
- Education: Health awareness sessions at upper primary and secondary level, teacher's orientation, engagement of children in community awareness drives, upgradation of classrooms and science laboratories

•	agriculture and livestock development Youth Engagement
•	Renewable Energy
	Watershed Management
•	Agriculture Development

Summary Achievements

3,130+ Villages and Slums Covered	475,418 + Household Reached	
7,470+ Village Health and Nutrition Days (VHND) supported.	496 School Reached	
1,749 Long Lasting Insecticide Nets (LLIN) distributed.	6,056 ASHA Trained on Dengue and Malaria	
933 Health Care Providers Trained on Dengue and Malaria	3,869 Community Volunteer Trained	
31 Kgs of plastic and 50 kg other solid waste disposed	76 Adolescent girls Trained on menstrual hygiene and health and support of sanitary pads	
53,392 Cluster Reached Through Home Visit	16 Adolescent girls' groups	
4,229 Communication Campaign and Awareness Drives	477 Press coverage	

Our Key Achievements

Fighting Vector Borne Diseases - Malaria and Dengue

FH India works with rural and urban areas to decrease in malaria and dengue related morbidity by sustainable behaviour change and continued access to services for prevention, diagnosis, and treatment.

FH India works with rural and urban community on health and sanitation. Our team support government frontline workers (ASHA) in early diagnosis of malaria and dengue in rural tribal and slum areas. Health camps are organised from time to time during peak season. Field workers do regular follow-up of patients who test positive for treatment completion. The team works with gram panchayats and community volunteers on sanitation and cleaning drives in villages and slums. During the period of 2022-23, 6,056 ASHA workers and 1,618 health care providers (HCP) were trained on vector borne disease prevention, control, and treatment. World Malaria Daya and National Dengue Day observed in all 18 project districts.

ASHA/USHA workers were initially not confident in administering the rapid diagnostic testing kit (RDT) for malaria. After hands-on training and technical trainings using e-modules developed by FH India, they started testing and reporting cases. They also learned dose and medicine administration for malaria. As a result of that screening and testing, number of suspected malaria cases increased and were linked to treatment.

Social awareness and community mobilization through community meetings and household visits is one of the primary areas of the work of our field workers. Regular community meetings called earlier called chaupals are held in every 25-30 family clusters now due to covid-19 restrictions we moved to household visits. 53,392 Clusters visit were conducted in the reporting year, reaching 475,418 families four times through the year with the massages on malaria prevention, control, and treatment. Household visit to give messages on dengue malaria, increased community awareness about mosquito borne diseases and how they can reduce mosquito breeding by cleanliness, use of mosquito net and other repellents.

Home Visit session on malaria (Photo: FH India)

FH India conducted various community drive events, like Sanitation drives were conducted by village youths to make community aware about use of household toilets by all members, storage and handling of drinking water, handwashing practices by all household members, communication Van, National Dengue Day, National Youth Day, World Malaria Day.

National Dengue Day 2022 celebration in district (Photo: FH India)

Working with students is always beneficial to change social behaviour. FH India worked closely with the schools and school-going children. 311 school awareness campaigns were conducted on vector borne diseases. Children were engaged in cleanliness drives and in undertaking rallies on different themes on different occasion.

Engaging Youth as Change Agents

Activities Observed

- Observed Adolescents Girls Day- 76 girls participated.
- National Unity Day observed 93 youth participated.
- Program review meetings 3 review meeting conducted.
- Support in VHNDs 3 VHND supported by project.
- National Youth Day observed- 79 youth participated.

Engaging youth Volunteers

- Nehru Yuva Kendra Sangathan 2 programs (national unity day -93 youth participated and oath carrier counselling program- 90 youth participated)
- Jan Abhiyan Parishad 32 youth volunteers in 1 program

Meeting with groups of adolescent girls

Project has formed 16 groups of adolescent girls. Total 36 meetings were organized with adolescent girls.

Water and sanitation

Community mobilization for cleanliness:

- Project team has mobilized community members and garbage vulnerable points and drains were cleared for 6 sites.
- Volunteer Shramdan was done by youths at 6 places.
- Cleaning garbage vulnerable points 6
- 6 Cleanliness drive conducted for reduce the use of single use plastic 4 villages by engaging 87 youth volunteers. 31 Kgs of plastic and 50 kg other solid waste disposed.

Training of Volunteers in Bhind district of Madhya Pradesh (Photo: FH India)

SAHYOG

SAHYOG IS A CAPACITY BUILDING PROGRAMME OF NACP

Progress & Achievement -

- 23 states and Union territories covered in year 2022-2023 out of 36
- 31 batches of training conducted national and state levels where 884 participants trained
 - NACO 27
 - SACS 309
 - TSU 73
 - DAPCU 336
 - Others 139

CLM

COMMUNITY LED MONITORING IN THREE NORTHEAST STATES OF INDIA- A PILOT INITIATIVE-

The main goal of the CLM pilot was to capacitate and empower community-based organizations, community resource groups, networks, and community champions to understand and lead CLM in their respective geographies.

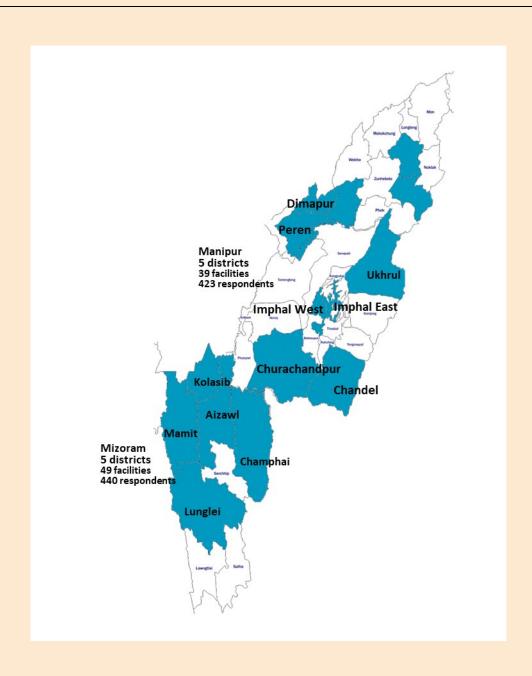

The specific objectives were:

- (a) To identify and engage community consultants at the community and district level
- (b) To gather feedback from community members on quality of HIV services and analyze data
- (c) To generate solutions in consultation with community members and service providers
- (d) To engage with district and state officials for initiating action
- (e) To track and disseminate results.

Family Health India implemented the CLM pilot project to demonstrate an effective community-led process and use of data for decision making at district, state, and national level.

The activities included data cleaning, data analysis, generation of score cards from 1,399 interviews in 145 facilities based on five indicators: Availability, Accessibility, Appropriateness, Responsiveness, and Satisfaction. The Strategic Expertise Technical Unit (SETU) team shared the score cards and qualitative feedback with each facility manager at the NGO TI level or Government facility level and developed collaborative action plans to address the issues. In addition, the SETU team also developed district action plans in consultation with DAPCU/DISHA officials. The state draft reports along with state and district action plans were shared with the SACS for feedback and comments.

- 3 states
- 15 districts (5 in each state)
- 56 Community Consultants
- 145 facilities,
- 1,399 respondents

Our Team Senior Leadership

Dr. Bitra George, Director, has more than 27 years of experience in managing sexual and reproductive health and HIV/AIDS programs in India, spanning national and community levels. He is the Country Director of the FHI 360 India, Sri Lanka and Maldives Country Offices since March 2003. Dr. Bitra is managing a complex portfolio of public health projects on HIV/AIDS, family planning, vector borne diseases and health system strengthening. Dr. Bitra George a Director and member of the Board of Directors (BoD) of FH India since 2008.

Sharad Malhotra, Director, has over 25 years of experience in financial and administrative management of development projects. As Director, Finance and Administration of FH India, he is responsible for procurement and financial and contractual management. Mr. Malhotra currently supervises the finance, contracts and grants, administrative staff and liaises with the FH India field offices. He is familiar with the compliances and reporting requirements of several donors including USAID, CDC, BMGF, UN, Indian Foundations and CSR. Mr. Sharad Malhotra is a member of the Board of Directors (BoD) of FH India since 2008.

Management Team

Som Kumar Sharma, Associate Director has over 20 years of experience in managing public health programs, nurturing partnerships, consortium management, health systems strengthening. His experience includes managing large scale programs on reproductive, maternal, new-born, child and adolescent health (RMNCH+A), family planning, routine immunization, tuberculosis, HIV/AIDS, vector borne diseases, and WASH. His current areas of expertise are program management and managing technological innovations in public health.

Rajesh Kumar Mishra, M&E and Documentation Officer has more than 14 years of experience in the field of knowledge management, documentation and monitoring and evaluation (M&E). He is responsible for designing and operational roll-out of documentation, knowledge management, M&E and research assignments.

Senior HR, Admin & Compliance Officer: Ms. Surbhi Saxena is a HR Professional with meritorious academic record and extensive work experience of more than 12 years in Human Resources, Administration and Compliance in the development sector with renowned National & International organizations like Delhi Disaster Management Authority, Govt. of NCT of Delhi; SAARC Disaster Management Centre (an Inter-Governmental Organization with Ministry of External Affairs, Govt of India as nodal Agency) and International

NGOs Médecins Sans Frontières and Jesuit Conference of India/South Asia.
